

LPG Detector

Gas leak alarm suits applications mainly in long-time slow gas leakage detection, it adopt microcomputer controlled AD system enable detection work status under low power consumption situation.

Applications

- Liquefied Petroleum Gas Systems

Technical Specifications

Supply Voltage	240V AC, 50/60 Hz.
Power	2VA Max
Protection class	IP 42
Insulation class	II
Operating temperature	-5°C to +35°C
Relative humidity	5% to 95%
Fitting	Wall Mounted
Solenoid valve control relay	potential free relay
Audible alarm signal	Intermittent
Certified by Central Mining Institute, Poland
