

## **Electrical Data**

|                     |                                                                    |
|---------------------|--------------------------------------------------------------------|
| Ex Marking          | Ex d ib IIC T6                                                     |
| Classification      | Group II, Catogory 2 GD; Class I, Division 1 and 2, Group A,B,C,D; |
| IP Degree           | IP66                                                               |
| Corrosion Resistant | WF1                                                                |
| Input Voltage       | AC220V/DC24V/ DC36V                                                |
| Power               | 5-10W;                                                             |
| Sound Intensity     | 90; 120; 180; 120                                                  |
| Flash Frequency     | 150 times/Min                                                      |
| Color               | Red, Yellow, Blue, Green                                           |
| Conduit Entries     | G 3/4"                                                             |
| Mounting Styles     | Base; Stanchion                                                    |
| Net Weight          | 1.8kg;                                                             |
