

Clifford & Snell®

Yodalight® YL80 Hi-Vis

**Multi-purpose Audible & Visual
Signalling Device designed for use in
Fire, Industrial & Marine applications**

PRODUCT FEATURES

- Max sound output 116 dB(A) @ 1m
- IP66 rated as standard
- High Brightness LED Beacon
- 32 selectable tones meeting international regulations
- Flame retardant ABS enclosure
- Stainless steel fixings
- 2 stage alarm
- Independently selectable second stage
- Lens available in eight colours

Product Approvals

Marine Equipment Directive MED
Regulations EN 54-3:2014 incl. A1:2019
IEC 60092-504:2016 IEC 60533:2015
Module B (BSI/MED/3.53/756093)
Module D (BSI/MED/PC/756095)

BS EN 54-3 : 2001 + A1:2002 + A2:2006
Type B
0086-CPR-774029

TECHNICAL DATA

Electrical Data

Operating Voltage	Current Draw
24vDC --- (12 LED)	370mA at Tone 1
24vDC --- (25 LED)	395mA at Tone 1
48vDC ---	380mA
115vAC ~	200mA
230vAC ~	135mA

Mechanical Data

Enclosure Material	ABS FR UL94 5VB
Lens Material	PC FR UV Stable UL94 HB
External Fixings	Stainless Steel
Degree of Protection	IP66 (IEC60529)

Ambient Conditions

Operating Temperatures	
Standard General	-35 °C to +70 °C
EN54 Pt:3 Fire	-25 °C to +55 °C
Storage Temperature	-40 °C to +70 °C
Max. Relative Humidity	93% ± 3 at 40 °C

Acoustic Data

Maximum Volume Output	116dB (A)
2 Stage Alarm with Independently Selectable tones via DIL Switch	

Mounting / Installation

Devices should be mounted to a suitable flat wall or bulkhead avoiding any undue vibration and using the two lugs projecting from the case. The lugs are bored 10mm on 250mm centres. The minimum length of fixing screw required is 30mm. To maintain the IP rating of the enclosure, the cable entries must be fitted with a suitably rated cable gland (included). Max cable termination 2.5mm².

Luminous Characteristics

Array Type	24vDC --- (*)	12 High Brightness LEDs
	24vDC --- (**)	25 High Brightness LEDs
	48vDC --- (**)	25 High Brightness LEDs
	115vAC ~ (**)	25 High Brightness LEDs
	230vAC ~ (**)	25 High Brightness LEDs
Flash Rate	(*) 60 FPM, (**) 60/120 FPM User selectable	

Line integrity on 24vDC systems

- For 3 wire 2 stage alarm system, monitor via reverse polarity.
- For 2 wire 2 stage alarm system, monitor via threshold, (applied voltage < 1v) an end-of-line (E.O.L) resistor is required for line monitoring and should have a minimum resistance of 3k3 Ohms and 0.5 Watts, wire-wound or metal film type.

Multi-Stage Alarm

The YL80 Hi-Vis units are supplied with a 2 Stage Alarm option with Independently Selectable tones (see tone table on the installation sheet for details) across all voltage options as standard.

Dimensional Drawing

We reserve the right to make alterations to the technical data, dimensions, weights, designs and products available without notice. The illustrations cannot be considered binding. All Dimensions in mm [inches] - Subject to alterations
